Hepcinat 400 mg Tablet is an antiviral medicine used in the treatment of chronic hepatitis C infection. It is also used in patients with liver cancer and hepatitis C infection who are planning to have a liver transplantation.

Hepcinat (Sofosbuvir) - 400mg (28 Tablets) What is Hepcinat? Hepcinat containing the active ingredient sofosbuvir is a nucleotide polymerase inhibitor type of antiviral medication used to treat Hepatitis C. The medication must be used in combination with other antiviral medicines to reduce the amount of hepatitis C virus (HCV) in the body to help the liver recover.

Hepcinat (Sofosbuvir) film coated tablets each contain 400mg of the main ingredient. The dosage schedule must be individualized by the physician in charge of treatment, and will vary according to the viral genotype that is being treated.
